

# KARAN KUMAR

[karankumar.dev](http://karankumar.dev)

I'm an aspiring Software Developer and UX/UI Designer. Specialized in building Frontend Web Applications, Integrations, and Mobile UI Designs. My Skillsets include design tools like Adobe XD, Figma & languages like JavaScript, CSS3, and HTML5 together with frameworks like React JS and Material UI. I do this because I love to integrate High-End Technologies with stunning designs.

## Experince

2022

### Volunteering

At Smart India Hackathon

Tremendous Experince during the hackathon organized by Galagotia's University. Learned so much about managing and talking to new peoples. My primary job was to accomodate the teams who have participated in the event.

2021

### Technical Artical Writing

For CodMentor

This was my first freelancing work, which came to me as oppourtunity from my blogs profile on dev.to. I worked with them 10 days and successfully build a project and wrote a full article and submitted to them. Learned about working with professionals and a proper way to write a technical article.

## Certifications

C

### Front-End Web Development with React

From Coursera

In this course, learned about development with react which includes various things like npm, full stack project management and much more.

C

### Front-End Web UI Frameworks and Tools

From Coursera

This course helps me to build a complete frontend of a web app from scratch using amazing technologies like bootstrap, js, etc.

C

### Responsive Web Design

From FreeCodeCamp

This course, contributed a lot in my css skills, after which I can confidently create the beautiful designs from scratch only with CSS.

## Latest Project

2021

### Personal Website Portfolio

For all my work, and skills

A place on the internet, which I called as home, where users can go and see the real me, and explore all my project and other things.
